

NANOMADE @CES 2018

VALEO showcased Nanomade's technology in an exhibition car
Gold Lot - LVCC, North Plaza - NP-5

With Nanomade, a glimpse of the automotive future was showcased at CES LAS VEGAS 2018: a car connected to the passengers' vitals.

Nanomade's presence at the event marked the beginning of a new step for the company. Six months after its selection for the Mobile WellBeing Challenge by Valeo, Nanomade proudly contributes to Valeo's take on individualized in-vehicle comfort at CES 2018.

With its vitals monitoring sensors integrated into the car seat, Nanomade, delivers data that helps adjusting the cabin ambiance based on the vehicle occupant's mood and physical condition.

"The future of automotive: a car connected to the passengers' heart and breathing".
